

Aerial Work Platforms

Aerial Work Platform - There are various lift truck attachments existing on the market. They can help transform your forklift so that you can expand your ability to pick objects up or accomplish clean up jobs and material handling with out difficulty.

Many of the attachments are specifically designed so as to fit on the forks themselves. Fork extensions for example, are used when you need more blade length, that increases lifting capability. Blade extensions come in lengths ranging from 48-120 inches. Triangular or rounded accessories are another type utilized if transporting rolled material so as to make sure it does not roll off of the typical flat blades.

Examples of lifting accessories consist of pivoting and telescoping crane or boom attachments. They can come in quite a few various kinds and are most often used for transporting metal bars, lumber, poles and different sort of bulky items. Additional accessories like different styles of hook plates and hooks are offered so as to pick up objects making use of a sling or chain. Slab lifters and magnetic lifters are other stuff that could be used along with hook accessories. Slab lifters are specialized accessories which are intended for lifting different materials which are delivered in a sheet or slab format. Carpet poles and rug rams are other lifting tools that attach to your forklift so as to make transporting rolls of carpet easier. The attachment hooks onto the forklift's forks and has a pole which goes through the middle of the carpet roll.

There are several kinds of lift truck attachment meant for facility maintenance like for example snow forks. These industrial forks could be attached to front end loaders and utilized for transporting materials like for instance dirt, and mulch as well as snow. Other popular cleanup accessories consist of magnetic sweepers and standard sweepers. Standard sweepers consist of a broom which the lift truck blades connect onto for sweeping large spaces such as factory floors, parking lots and warehouse. The magnetic sweeper is the same except that it has a magnetic plate rather than bristles. The magnetic sweeper is used in areas where there is lots of metal fragments such as on shop floors for instance. Sweepers have widths up to sixty inches and this surface area makes clean up quick and effortless.

Material spreaders are other accessories used on forklifts. These spreaders are handy for a range of applications like for instance spreading seeds, ice melt, rock salt, pellets, fertilizers and insecticides.

Another optional lifting accessory are work platforms. These can be used by a lot of different businesses on a daily basis. Platforms may differ in size from 36" x 36" to up to 60" x 60". A few models may be offered and are capable of folding up and storing into a smaller place. Work platforms are designed to raise staff up to an overhead location utilizing the lift truck. Larger platform models have added space for workers so as to carry tools and other essential stuff for the task. Often work platforms are constructed of steel or ploy material.
